

LOVE *your* CANDLE

PLEASE FAMILIARISE YOURSELF WITH ALL SAFETY GUIDANCE ON THE CANDLE BEFORE USE.

1 TRIM YOUR WICK

Use our handy Wick Trimmer to keep your wick neat and tidy. Trim your wick to 3mm before each burn.

2 USE AN ILLUMA-LID® JAR CANDLE TOPPER

Your candle's best friend! They look beautiful and help steady the flame for a clean, even burn. Choose your favourite design and use with our Medium and Large Jar Candles.

3 ALLOW TO POOL

Let the top layer of wax liquefy and pool to the edges to avoid tunnelling. Wondering how long this should take? We recommend, that for every 1 cm in diameter, you burn for 30 minutes - so a Large or Medium Candle Jar would be 4 hours.

4 PROTECT YOUR SURFACES

Use our decorative Candle Shades and Trays to prevent heat damage to your surfaces and encourage an even burn. Use with our Medium and Large Jar Candles.

5 KNOW WHEN TO SAY GOODBYE

We never like to see the end of our favourite fragrance, but once your candle wax is 1cm from the bottom; it's officially finished. Time to choose another favourite to burn.

DID YOU KNOW...

By purchasing a Yankee Candle you are supporting Animal Charities. Yankee Candle South Africa donates R2.00 for every candle sold online or in-store.
